

## Information Security Policy and Documents

To protect the reputation, image, brand value and reliability of Sertrans Logistics and its stakeholders;

- In order to ensure business continuity of our business processes, to handle information assets within the framework of confidentiality, integrity and accessibility and to evaluate the risks, including opportunities, within this scope,
- Structuring our information security management system to create, review and continuously improve the records and documentation in accordance with ISO 27001 standard,
- To follow all legal conditions for information security,
- We are committed to effectively and efficiently direct all our resources to this purpose, so that our employees receive training to increase awareness of information security and the continuous development of the system.
-
